***Information Disclosure Statement***

1. The information disclosure statement filed on 14 January 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It is noted that the part of the information referred to **“Database WPI, Section EI, Week 200047, Derwent Publication Ltd., London, GB; Class U23, AN 2000-519766, XP002237855”** as listed under “other prior art” section of PTO-1449 has not been considered, because a legible copy of such document could not be found.

If the applicant wishes that document to be considered, please provide the legible copy of the above-mentioned document before the issue fee is paid.

***Allowable Subject Matter***

2. The following is an examiner’s statement of reasons for allowance: it is noted that claims 12-22 are considered allowable over the prior of record since prior art of record fails to show or fairly suggest the two incoming reference clocks are multiplied by a factor “n” to create clocks of a higher frequency, and one of these higher frequency clocks is then selected, and following the selection, the selected higher frequency clock is then divided by “n” again, resulting in a lower frequency clock, and inputting the frequency divided signal into a PLL circuit for generating the frame synchronization signal as substantially described and connected in independent claims 12 and 17 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### *Conclusion*

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Following references are related to the present claimed invention:
